Dimensions

Solidtech bathtubs are essentially composed of a combination of resins and natural mineral fillers. Solidtech is a material highly resistant to impacts, it is non-flammable and self-extinguishing, it also resists high temperatures, abrasions, acids, solvents and all detergents commonly used for cleaning. The bathtub has a non-porous and homogeneous surface.

The bathtubs are covered with a Gelcoat surface layer, a polyester resin-based substance colouring with ISO 27447-2009 certified antibacterial properties.
